Projects

Weather Application
GitHub / Live
React.js, Bootstrap

- Used external **API** to retrieve weather data with **Axios** library
- Implemented functional components and **hooks** like **Effect** and **State** for unit conversion and data display/tracking per location

Online Fast Food Restaurant
GitHub / Live
React.js, Bootstrap

- Optimized performance with a **custom Axios hook** for efficient handling of API calls
- Integrated shopping cart using **useContext** and **useReducer**
- Implemented category-based and **server-side filtering** for precise menu item searches
- Implemented navigation with **React Router DOM** and **infinite scroll** for customer reviews

Programmers team
GitHub / Live
React.js, Bootstrap

- Employed **context API** to manage theme changing
- Incorporated **server-side pagination** to manage the number of displayed items per page, based on page size

Coffee Shop Website
GitHub / Live
JavaScript, CSS

- Implemented a shopping cart feature using JavaScript and enabled data persistence through **local storage**, allowing customers to view their purchase history or return to their cart at a later time

Personal Portfolio
GitHub / Live
HTML, CSS, Bootstrap

- Implemented **responsive** design elements using the popular CSS framework Bootstrap to ensure adaptivity across all devices and screens

Professional Experience

Coordinator and Site Admin
(Feb 2023-Present)
Radio Margin

- Designed, developed, and maintained a fully responsive website using WordPress
- Coordinated various aspects of the project including timelines and deliverables to ensure project progress
